

DEVELOPMENT OF PROPOSED PROJECT LIST

The list of proposed projects was developed iteratively in consultation with state and local transportation partners. The initial list of projects to be considered for inclusion in the 2040 Metropolitan Transportation Plan was developed from the following sources:

- ▶ For continuity purposes, the project selection process used in the previous MTP was reviewed and its validity was confirmed. Those projects that had been identified by the previous MTP, but had not yet been implemented were moved forward for prioritization and consideration in the 2040 Metropolitan Transportation Plan.¹
- ▶ In June 2013, the Tyler Area MPO released an official call for projects to municipalities and transportation stakeholders within the Tyler Urbanized Area. One project was submitted by the North East Texas Regional Mobility Authority (NET RMA), which has been included, but does not require inclusion in the prioritization, as the project is expected to be fully funded by NET RMA. No other projects were submitted as a result of the call for projects.
- ▶ Through coordination with the Texas Department of Transportation district, additional projects were identified for prioritization and possible inclusion in the 2040 Metropolitan Transportation Plan.

The complete list of projects for evaluation and prioritization is shown in Table XIII-2.
